INDEX

Volume 33, 1954

ACETAMIDE: radioactive; enamel penetration, 767
Acid: carbohydrates, 671*
——: caries production, 664*
——: enamel decalcifying ability, 671*
——: plaque; anti-enzyme, 703*
——: production; saliva, 672*
——: production; salivary sediment, 561
——: (See also amino acid.)
Acrylics: adhesion; tooth structures, 699,* 701*
——: properties, 414
——: (See also resins.)
Adhesion: acrylic materials; tooth structures, 701*
——: human tooth structures, 699*
AFONSKY, D.: oral lesions; vitamin B deficiency; dogs, 645*
Age: mandibular condyle; osteoclast count, 683*
AGNEW, R. G.: ovariectomy; periodontal effects, 702*
Airbrasive powder: inhalation, 666*
Alginate: flow; temperature, 697*
ALLEY, J.: tooth root replantation; hamster, 675*
Alloys: gallium, 700* (See also amalgam.)
Alveolar bone: cortisone, 707*
——: resorption: hamsters; scoring, 704*
——: ——; therapeutic agents, 704*
Amalgam: condensation; residual mercury, 12
——: dimensional stability, 697*
——: manipulative variability, 701*
——: properties, 414
——: (See also alloys.)
Amblystoma punctatum: odontogenesis, 737*
Amino acid: dental plaque, 649*
——: dentin, 62
——: enamel, 646*
——: enamel decalcifying buffers, 650*
——: requirements; acidogenic organisms, 339
AMLER, M. H.: pulpitis; systemic antibiotic therapy, 737*
Amylase: saliva, 654*
Anesthetic: local; comparison, 653*
——: ——; efocaine, 665*
——: ——; epinephrine, 674*
——: ——; L-Norderin, 705*
Antibiotics: systemic therapy; pulpitis, 737*
Anti-enzymes: acid production, 703*
ARMSTRONG, W. D.: enzyme inhibition; fluorides, 685*
——: fluoride determination; hydrogen fluoride diffusion, 646*
——: fluoride ingestion; mammary carcinoma, 648*
Artificial mouth: dentinal attack, 681*
Aspirin: edema, 675*
AVERY, J. K.: enamel rod; three-dimensional structure, 718*
——: electron microscopy; dentinogenesis, 718*
——: ——; developing enamel, 690*
——: phosphatase; developing teeth, 646*
——: tooth formation; primary inductions, 702*
ASGARZADEH, K.: hygroscopic expansion; dental casting investment, 519
——: zinc oxide-eugenol impression paste; properties, 693*

BACTERIA: *Borrelia buccale*, 660*
——: caries, 147, 339, 662*, 679*
——: chlorophyllin effect, 571
——: connective tissue effects, 666*
——: dentin; chondroitin sulfate effect, 667*
——: electron micrography, 679*
Bacteria: acidogenic; amino acid requirements, 339
——: filamentous, 665*
——: gingivitis, 454, 624
——: precipitate formation, 678*
——: proportions; penicillin, 689*
——: salivary; respiration, 469
BAKER, R. F.: carious dentin; electron-microscopy, 20
BATTISTONE, G.: enamel; amino acid content, 646

*Indicates abstract.

BAUER, W. H.: salivary gland tumors; mice; transplantability, 659*
BAUME, L. J.: hypophysectomy; effect on rat incisors, 91
——: ——; growth hormone; thyroxin; effect on rat incisor, 104
——: thyroidectomy; effect on rat incisor, 80
BAVETTA, L. A.: tryptophane deficiency; effect on rat jaws, 309
BECKS, H.: hypophysectomy; effect on rat incisor, 91
——: ——; growth hormone; thyroxin; effect on rat incisor, 104
——: thyroidectomy; effect on rat incisor, 80
BELL, J. T.: caries; salivary acidity and alkalinity, 55
BELL, W. B.: gingivitis; chlorophyll dentifrices, 647*
BEN-SHUSHAN, H. Q.: caries; Israel, 719*
BISHOP, J. G.: fluorides; blood vascular system effects, 648*
BITTNER, J. J.: fluoride ingestion; mammary carcinoma, 648*
BIXLER, D.: rat caries; castration; desalivation; endocrines, 648*
BLACKWELL, R. Q.: dental plaque; amino acids, 649*
——: sarcosinate; glycolytic scheme effect, 652*
BLANCHET, L.: screening test; mucin adsorbing enzyme inhibitors, 683*
BLAYNEY, J. R.: fluoridation; caries rates; 6-, 7-, 8-year-olds, 662*
——: fluorine retention; human tissue, 691*
——: germfree animal technic; experimental dental caries, 147
Blood: vascular system; fluoride effects, 648*
Blood sampling: animals; methods, 710*
BLUM, A. S.: radioiodine uptake; ivory, 702*
BODECKER, C. F.: rat molar tooth germ cultivation; Carrel flask, 189
Bone: analysis; radiographic technique, 656*
——: grafts; freeze-dried, 655*
——: metabolism; parathyroid extract, 669*
——: implant; starch sponge, 668*
BONNER, J.: fluoride uptake; radioactive fluorides, 661*
Borrelia buccale, 660*
BOYD, J. D.: radioiodine uptake; ivory, 702*
BOYLE, P. E.: x-radiation; salivary glands, 715*
Brain center localization: Neurophysiological phenomena, 681*
BRADFORD, E. W.: reptile teeth, 733*
BRAUER, G. M.: polymerization rate; methyl methacrylate; accelerators, 695*
——: water sorption; methyl methacrylate, 693*
——: zinc oxide-eugenol reaction, 694*
BREWER, H. E.: fluorides; enamel permeability to sodium ions, 650*
Brown spots: histologic and physiologic aspects, 647*
BRUCE, M. A.: gingivitis; bacterial factors, 454
——: ——; bacterial tissue-destructive products, 624
BRUDEVOLD, F.: acrylic adhesions; enamel surfaces, 694*
——: adhesions; acrylic autopolymers; tooth structures, 701*
——: anti-enzymes; plaque acid production, 703*
——: fluoride depth; enamel, 650*
——: fluoride uptake; radioactive fluorides, 661*
——: micro-antimony electrode, 849, 854
——: pH; oral salivary; fecal; hamster, 710*
——: radioactive-tagged sodium fluoride; soft tissue distribution, 709*
——: topical fluoride application; comparison, 661*
Brushing: caries, 690*
BUDY, A. M.: estrogen effect; alveolar bone; gingiva, 115
BULLOCK, F. A.: powdered enamel and dentin; fluoride reactions, 674*
BUONACORE, M. G.: adhesion; acrylic autopolymers; tooth structures, 701*
——: acrylic adhesion; enamel surfaces, 694*
——: amino acid; effect on enamel decalcifying buffers, 650*
Bur: dental; cutting efficiency, 281, 693,* 696*
BURNETT, G. W.: cytochrome oxidase; succinoxidase; oral tissues, 680*
——: dentin chondroitin sulfate; bacterial effects, 667*
——: enamel; amino acid content, 646*
——: hamster dentin and enamel; spectrochemical analysis, 651*
——: inorganic constituents; hamster dentin and enamel, 487
——: microbial flora of saliva; respiration, 469
BURNS, C. L.: denture repairs, 700*
BURRILL, D. Y.: gingivitis; chlorophyll dentifrices, 647*
BURSTONE, M. S.: salivary glands; mucin contents, 651*
BUTCHER, E. O.: periodontal fiber reattachment, 737*

——: replanted incisors, 703*
BUTT, B. G.: radioactive distribution teeth; post-mortem changes, 651*
BENNETT, D. T.: penicillin; tooth permeability, 734*
BERGREN, W.: tryptophane deficiency; effect on rat jaws, 309
BERK, H.: pulpotomy; histologic evaluation, 647*
BERNICK, S.: carious dentin; electron microscopy, 20
——: tryptophane deficiency; rat jaw; effect, 309
BESIC, F. C.: artificial caries, 647*
BERLIN, R.: electronic stimulation; oral tissues; medullary response, 658*
Beryllium: caries, 670*
BEVELANDER, G.: nucleic acids; alkaline phosphatase; tooth development, 128
BJORN, H.: photogrammetric method; facial swelling volume, 295
BHASKAR, S. N.: estrogen effect; alveolar bone; gingiva, 115
BHUSSRY, B. R.: brown spots; histologic and physiologic aspects, 647*
BIBBY, B. G.: acid formation; carbohydrate foods, 671*
——: chlorophyllin; effect on oral organisms, 571
——: gingivitis; bacterial factors, 454
——: ——; bacterial tissue-destructive products, 624

CALCIFICATION: calcium intake, 676*
——: citrate incorporation, 497
Calcium ion: diffusion; sugar effects, 212
Calcium phosphate: crystallography, 741
Calculus: crystallography, 741
——: salivary phosphatase, 335
——: silicones and lactones, 670*
Carabelli's tubercle: 435
Carbohydrate: acid formation, 671*
——: diet; parabiosed rats, 175
——: (See also sugar.)
CARBON, J. A.: sarcosinate; glycolytic scheme effect, 652*
Carocinogenesis: hamster cheek pouch, 253
Carcinoma: fluorine ingestion, 648*
Caries: acidogenic organisms; amino acid requirements, 339
——: artificial, 647*
——: attack rate, 65
——: beryllium, 670*
——: brushing, 690*
——: caries-susceptibility; rats, 558
——: castration, 648*
——: children, 542, 552, 654,* 659,* 719,* 808
——: chemical aspects, 655*
——: chlorophyllin; urea combination, 709*
——: clinical evaluation standards, 668*
——: clinical tests; diagnosis reversals, 682*
——: copper cement, 735*
——: dentifrice, 606,* 690*
——: dentin, 20, 733*
——: desalivation, 346, 648,* 657,* 666*
——: dextrose effects, 824
——: diet, 27, 658,* 714,* 715*
——: ——; suckling period effects, 245
——: diethylstilbestrol, 842
——: distribution; children, 613
——: early enamel lesions, 218, 231
——: EDTA, 707*
——: ——; effect; reversal, 660*
——: electron microscopy, 665,* 684*
——: endocrines, 648,* 685*
——: estradiol, 842
——: experience; institutionalized children; Pacific Northwest, 552
——: experiment participation effects, 690*
——: fluorine, 33, 662,* 735,* 842
——: ——; lactobacillus counts, 662*
——: ——; topical, 661*
——: ——; ——; adults, 652*
——: food habits, 715*
——: germfree animal technic, 147
——: hypophysectomy, 685*
——: incidence, 808
——: infant diet, 27
——: inorganic salts; effects, 676*
——: Israel, 719*
——: Kalahari bushmen, 654*
——: lactobacillus, 679*
——: mastication, 714*
——: noncarious lesion, 655*
——: oral hygiene, 690,* 714,* 715*
——: parabiosed rats, 175
——: personality, 357, 672*
——: physicochemical phenomena, 206, 212
——: polyhydric alcohol; fermentation, 717*
——: preschool children, 654*
——: prevalence; Idaho children, 542
——: provincial survey, 659*
——: resistance; hamster, 676*
——: saliva, 751
——: salivary acidity; alkalinity; pH, 55
——: salivary tryptophane, 316
——: silver nitrate, 735*
——: skim milk powder fractions; whey powders, 658*
——: socio-economic level, 715*
——: stannous fluoride, 33, 606
——: sucrose administration, 688*

——: sucrose and acid applications; hamster, 664*
——: sugars, 666,* 717*
——: Tel Aviv, 711*
——: urea-copper chlorophyllin combination, 709*
Caries-immune plaque: pH; lactate content, 656*
Carious teeth: amino acid composition, 62
Casting investment: dental; hygroscopic expansion, 519
Castration: fluorine storage, 346
CARLISLE, F. B.: irreversible impression materials; Sears technic, 699*
Carrel flask: rat molar tooth cultivation, 189
——: tooth germ cultivation, 181
CARTER, W. J.: pH; lactate content; caries-immune plaque, 656*
——: topical fluoride; caries; adults, 652*
CARTON, C. A.: herpetic infections; trigeminal section, 737*
CAUL, H. J.: resin cements; resin fillings; posterior teeth, 698*
Cavity: noncarious; rat molar, 655*
Cavity preparation: paraformaldehyde; pulp response, 663*
——: pulpal response, 713*
——: secondary dentin, 718*
Cavity wall: appearance; instruments, 699*
Cement: dental; electrical conductivity, 400, 699*
——: ——; thermal conductivity, 511
——: ——; tooth adhesion, 694,* 699,* 701*
Cementum: whale; thymine, 735*
Cephalometric roentgenography: infants, 681*
CHAUNCEY, H. H.: saliva; proteolytic enzymes, 652*
——: whole salivary enzymes; determination distribution; origin, 321
Chelating agents: demineralization of hard tissues, 136
Chewing: phosphorus exchange, 677,* 801
Children: caries, 542, 552, 654,* 659,* 719*
CHILTON, N. W.: Latin square design; experimentation, 703*
Chlorophyllin: alveolar crest resorption, 704*
——: caries, 709*
——: effect on oral organisms, 571
——: gingivitis, 647*
Chondroitin sulfate: dentin; bacteria, 667*
Chromium-cobalt alloys: partial dentures, 695*
Citrate: calcification effect, 497
CLARK, H. B.: developing tooth transplantations, 653*
CLARK, J. P. H.: procaine; unacaine: lidocaine; comparison, 653*
CLAYCOMB, C. K.: salivary amylase; quantitative test, 654*
CLEMENT, A. J.: Kalahari bushmen; oral conditions, 654
COHEN, M. M.: preschool dental survey, 654*
——: pulpotomy; histologic evaluation, 647*
COLEMAN, R. D.: ovariectomy; periodontal effects, 702*
Collagenase: oral tissue effects, 683*
Color: post-mortem changes; teeth, 735*
Common cold: oral prophylaxis, 708*
Conductivity: dental cement, 400, 511, 699*
Connective tissue: bacterial and chemical effect, 666*
COOKSEY, D. E.: freeze-dried bone grafts; cysts, 655*
COOLIDGE, T. B.: caries; chemical aspects, 655*
COPELAND, H. E., JR.: zinc oxide-eugenol reaction, 694*
Copper cement: caries, 735*
CORNELL, J.: resin filling materials; thermal expansion water sorption, 697*
Cornification: histochemical observations, 686*
Cortisone: alveolar bone, 707*
——: estrogen effect, 707*
——: extraction wound healing; rat, 4
COSTICH, E. R.: alveolar bone resorption; scoring; hamsters, 704*
——: ——; hamster; therapeutic agents, 704*
CRAWFORD, W. H.: acrylics; amalgams; evaluation, 414
——: fluid penetration; restorations, 694*
CROWELL, W. S.: amalgam alloys; metallography, 592
Crystallography: calculus, 741
COX, B. J.: noncarious cavity; rat molar, 655*
CURBY, W. A.: bone analysis; radiographic technique, 656*
Cutting efficiency: dental burs, 281, 693,* 696*
Cyst: freeze-dried bone grafts, 655*
——: gingiva, 732*
Cytochrome oxidase: oral tissue, 680*
CZERNIEJEWSKI, J.: fluorine retention; human tissue, 691*

DAHLBERG, A. A.: variant dimensional proportions; genetic and morphologic studies, 704*
DANIEL, L.: topical fluoride; caries; adults, 652*
DANØ, M.: crystallography; calculus, 741
DAVENPORT, R. M.: polymerization rate; methyl methacrylate; accelerators, 695*

DAY, H. G.: rat caries; inorganic salts, 676*
——: stannous fluoride; enamel solubility; experimental caries, 33
——: ——;dentifrice; caries, 606
Decalcification: enamel; acids, 671*
Deciduous teeth: composition, 736*
DEJONGE, Th. E.: hyperodontia, 705*
——: marigoid differentiation; tuberculum dentis, 705*
Dental bur: cutting effectiveness; design, 693*
Dentifrice: caries, 606,* 690*
——: chlorophyll; gingivitis, 647*
Demineralization: chelating agents, 136
Dentin: atack; artificial mouth, 681*
——: chondroitin sulfate; bacteria, 667*
——: hamster; inorganic constituents, 487
——: fluorides, 674*
——: formation in pulps, 718,* 738*
——: microradiographic studies, 731*
——: radioautographic visualization, 859
——: secondary; cavity preparation; fillings, 718*
——: ——; sterilizing agents, 712*
——: spectrochemical analysis; hamster, 651*
Dentinogenesis: electron microscopy, 718*
Denture: acrylic resins; self-curing, 696*
——: oral mucosa, 701*
——: repairs, 700*
Dextrose: caries, 824
Desalivation: caries; fluorine effects, 346
——: hamster caries susceptibility, 657*
Developing tooth: alkaline phosphatase; nucleic acids, 128
DEWAR, M. R.: caries activity; salivary mucin content and physical properties, 751
——: saliva; physical properties and mucin content, 596
Diagnosis reversals: dental caries test, 682*
Dibenzanthracene: tooth germ effect, 657*
DICKSON, G.: dimensional stability; amalgams, 697*
DICKSON, J. P.: caries experience; institutionalized children; Pacific Northwest, 352
Diet: caries, 27, 245, 658,* 714,* 715*
Diethylstilbestrol: caries; fluorine metabolism; salivary glands, 842
Dilantin sodium: gingival effect; rat, 468
Dimensional proportions: teeth; genetic and morphologic studies, 704*
DISALVO, N. A.: Phosphorus exchange; enamel; chewing, 677*
——: tooth phosphorus exchange; chewing effect, 801
DOCKING, A. R.: dental amalgams; manipulative variability, 701*
DOBBS, E. C.: L-Nordefrin, 705*
DREIZEN, S.: amino acid requirements; acidogenic organisms, 339
DUSZA, B.: screening test; mucin adsorbing enzyme inhibitors, 683*

EDEMA: aspirin, 675*
Editor's Viewpoint: 1, 145, 293, 441, 579, 739
EDTA: caries, 660,* 707*
Efocaine: 665*
EICKENBERG, C. F.: oral bacteria proportions; penicillin, 689*
EICHEL, B.: oxidative enzymes; pulp; gingival; subgingival gland, 656*
——: oxidative enzymes; x-radiation, 705*
Electrical conductivity: dental cements, 400, 699*
Electrode: micro-antimony; pH, 849, 854
Electronic stimulation: oral tissues; medullary response, 658*
Electron microscopy: bacteria, 679*
——: caries, 20, 665*, 684*
——: dentinogenesis, 718*
——: developing enamel, 690*
ELLINGER, F.: ionizing radiation; effect on rat incisors, 377
ELLIOTT, H. C.: infant diet; hamster caries incidence, 27
ELLISON, S. A.: herpetic infections; trigeminal section, 737*
ELSHEIMER, H. N.: fluoride reagents; effect on whole teeth, 538
EMMEL, V. M.: brown spots; histologic and physiologic aspects, 647*
Enamel: amino acid content, 646*
——: cuticle, 690,* 732*
——: decalcification; acids, 671*
——: decalcifying buffers; amino acids effects, 650*
——: fluoride, 50, 650,* 661,* 674*
——: electron microscopy, 690*
——: hamster, 487, 651*
——: permeability; fluorides; sodium ions, 650*
——: ——; radioactive substances, 767
——: phosphorus exchange; chewing, 677*
——: protein fraction; purification, 686*
——: rod; three-dimensional structure, 718*
——: spectrochemical analysis, 651*
——: solubility; stannous fluoride, 33
——: ——; surface, 504
——: surface structure; fluorides, 50
ENGEL, M. B.: bone metabolism; parathyroid extract, 669*

——: gingiva; pregnancy; electrometric studies, 658*
ENGLANDER, H. R.: mouth rehabilitation; salivary lactobacillus, 717*
——: pH; lactate content; caries-immune plaque, 656*
ENGLISH, J. A.: ionizing radiation; effect on rat incisors, 377
——: irradiation effects; salivary glands, 656*
——: x-radiation; salivary glands, 706,* 715*
Enzyme: inhibition; fluoride, 685*
——: ——; mucin adsorbing, 683*
——: intracellular; oxidative; x-radiation, 705*
——: oxidative; pulp; gingiva; subgingival gland, 656*
——: proteolytic; saliva, 652*
——: ——; submaxillary gland, 685*
——: saliva, 321, 652,* 685*
Epinephrine: hemodynamic pressor response, 674*
Eruption: permanent teeth, 65
——: teeth; hypophysectomy, 91
Estradiol: caries; fluorine metabolism; salivary glands, 842
Estrogen: alveolar bone; effect, 115
——: gingival effects, 115
Eugenol: zinc oxide; reactions, 694*
EVANS, H. M.: hypophysectomy; effect on rat incisor, 91
——: hypophysectomy; growth hormone; thyroxine; effect on rat incisor, 104
——: thyroidectomy; rat incisor growth, 80
Extraction wound healing: cortisone effects, 4

FABER, J. E., JR.: lactobacilli; hamster caries, 679*
Facial swelling: hyaluronidase, 657*
——: volume; photogrammetric measurement, 295
FALCETTI, J. P.: adhesion; human tooth structures, 699*
FARMER, E. D.: virus; oral mucosal ulceration, 731*
FEARNHEAD, R. W.: post-mortem color changes; teeth, 735*
——: pulp innervation; plasmal reaction, 734*
FERRIS, W.: electron micrography; oral bacteria, 679*
FESSENDEN, E.: magnesian Whitlockite; x-ray diffraction identification, 687*
Fillings: cavity design; stress pattern, 757
Filling materials: dentin growth, 712*
——: secondary dentin, 718*
FINN, S. B.: hamster caries susceptibility; desalivation, 657*
FISCHER, R. B.: fluoride reagents; effect on whole teeth, 538
——: ——; surface structure; enamel, 50
FISHER, A. K.: pulp; nitrogen content, 632
FISHER, R. B.: fluoride; enamel permeability to sodium ions, 650*
FLEMING, H. S.: methylcholanthrene effects; tooth germ transplants, 531
——: sodium and calcium fluoride ingestion during gestation, 780
——: transplanted tooth germs; dibenzanthracene effect, 657*
FLEUCHAUS, P. T.: hyaluronidase; swelling; trismus; impacted third molar region, 657*
Floor of mouth: formation, 732*
FLY, W.: dentures; oral mucosa, 701*
Fluoride: absorption; gastrointestinal tract, 711*
——: alveolar crest resorption, 704*
——: blood vascular system effects, 648*
——: carcinoma; mammary, 648*
——: caries, 33, 606, 662,* 676,* 735*
——: castration and desalivation effect, 346
——: concentration, 734*
——: dentin, 674*
——: determination, 646*
——: effects on whole teeth, 538
——: enamel, 50, 650,* 661,* 674*
——: ——; permeability; sodium ions, 650*
——: enzyme inhibition, 685*
——: lactobacillus; caries, 662*
——: ——; effects, 659*
——: metabolism; rat, 688*
——: pulp response, 713*
——: radioactive, 789
——: ——; soft tissue distribution, 709*
——: radiocalcium; deposition, 670,* 711*
——: stannous, 33, 50, 538, 606
——: storage; rat embryo, 669*
——: teeth and jaws, 780
——: thyroid iodine metabolism, 661*
——: tissue retention, 691*
——: topical, 661*
——: ——; adults, 652*
——: urinary excretion, 692*
Food habits: caries, 715*
FOLK, J. E.: skim milk powder fractions; whey powders; cariogenic effects, 658*
FORSCHER, B. K.: hydrogen ion diffusion; sugar, 206
——: periodontal pocket pH; tissue glycogen content, 444
——: sugar; effect on calcium and phosphate ion diffusion, 212
Fosdick, L. S.: aspirin; edema effects, 675*
——: dental plaque; amino acids, 649*
——: Kalahari bushmen; oral conditions, 654*
——: pH; lactate content; caries-immune plaque, 656*
——: sarcosinate; glycolytic scheme effect, 652*

——: sugar; calcium and phosphate ion diffusion, 212
——: ——; hydrogen ion diffusion, 206
FOSSE, G.: ground sections; apparatus and technic, 139
Fractures: permanent anterior teeth, 730*
Frog: tooth development, 706*
Fructofuranosidase: saliva, 729*
FULTON, J. T.: eruption; carious attack; permanent teeth, 65
Fusospirochetal infections, 663,* 671*

GARDNER, D. E.: fluoride depth; enamel, 650*
Gallium alloys: 700*
GANS, B. J.: gingiva; pregnancy; electrometric studies, 658*
GASTON, C.: dentinal attack; artificial mouth, 681*
BEHRIG, J.: tooth replantation; hamster, 675*
GEIGER, E.: tryptophane deficiency; effect on rat jaws, 309
Genetics: dimensional proportions; teeth, 704*
——: hamster caries, 663*
Germfree animal technic: caries, 147

Reversals: diagnosis; dental caries tests, 682*
Ribonucleic acid: gingiva, 707*
RICHARDS, J.: ultrasonics; cavity preparations, 698*
RICHARDSON, A. W.: fluorides; blood vascular system effects, 648*
RIEDESEL, M. L.: pulp; nitrogen content, 632
ROBINSON, H. B. G.: caries; dentifrice; brushing; participation effect, 690*
——: Editor's Viewpoint, 1, 145, 293, 441, 579, 739
——: I.A.D.R.; Proceedings; Thirty-Second General Meeting, 637
——: index, 873
ROSE, E. E.: adhesion; human tooth structures, 699*
——: resin filling materials; thermal expansion; water sorption, 697*
ROSE, H. M.: herpetic infections; trigeminal section, 737*
ROSENBERG, N.: dental caries; personality variables, 357
ROTH, G.: collagenase; oral tissue effects, 683*
ROTHBLATT, J. M.: histologic response; tooth movement; rat, 481

SALIVA: acid production, 561, 672
——: acidity; alkalinity; 55, 710,* 751*
——: amylase, 654*
——: caries, 55, 751
——: collection; separation, 683*
——: enzymes, 321
——: flow, 716*
——: fructofuranosidase, 729*
——: hexokinase, 664*
——: microbial flora; respiration, 469
——: mucin, 596, 751
——: pH, 55, 710*, 751
——: phosphatase; calculus; lactobacillus counts, 335
——: physical properties, 596, 751
——: polarographic analysis, 689*
——: proteolytic enzymes, 652*
——: reducing properties; indicators, 677*
——: sediment; acid production, 561
——: sodium; potassium, 716*
Salivary gland: diethylstilbestrol, 842
——: estradiol, 842
——: hypophysectomy effects, 685*
——: irradiation effects, 656,* 706,* 715*
——: mucin, 651*
——: oxidative enzymes, 656*
——: proteolytic enzyme, 685*
SALLEY, J. J.: experimental carcinogenesis; hamster cheek pouch, 253
SANNES, S.: topical fluoride application; comparison, 661*
Sarcosinate: glycolytic scheme effect, 652*
SAVARA, B. S.: caries; socio-economic level; food habits; oral hygiene, 715*
——: caries incidence; 1- to 6-year-old children, 808
Scaling: teeth; gingival sulcus; periodontal pocket, 682*
SCHERP, H. W.: glucuronidase; gingival pocket; streptococcal production, 684*
SCHLACK, C. A.: ionizing radiation; effect on rat incisors, 377
SCHMERZLER, E.: citrate incorporation; in vitro calcification, 497
SCHNELL, R. J.: electrical conductivity; dental cements, 400
SCHNEYER, C.: sucrose administration; hamster caries, 688*
SCHNEYER, L. H.: saliva; collection; separation, 686*
——: ——; flow rate, 716*
——: ——; sodium and potassium concentration, 716*
SCHOONOVER, I. C.: dimensional stability; amalgams, 697*
SCHOUR, I.: pulpal response; cavity preparation; sodium fluoride, 713*
——: ——; rat molar method, 674*
——: secondary dentin; cavity preparation; fillings, 716*
SCHULTZ-HAUDT, S. D.: gingivitis; bacterial factors, 454, 624
——: glucuronidase; gingival bacteria; streptococcal production, 684*
——: tooth surface pH; glucose rinse, 709*
SCOTT, D. B.: electron microscopy; carious enamel, 684*
SCRIBNER, J. H.: caries; salivary acidity; alkalinity; pH, 55
SELLERS, A. H.: caries incidence; provincial survey, 659*
SELLIG, A.: pulps; experimental dentin; formation, 738*
SHAFER, W. G.: caries; fluorine metabolism; salivary glands; estradiol; diethylstilbestrol, 842
——: cortisone; extraction wound healing, 4
——: desalivation; castration; caries; fluorine storage, 346
——: hypophysectomy; rat caries; salivary glands, 685*
——: rat caries castration; desalivation; endocrines, 648*
SHAY, D. E.: carious lesions; sugar and polyhydric alcohol fermentation, 717*
SHKLAIR, I. L.: mouth rehabilitation; lactobacillus counts, 717*
——: topical fluoride; caries; adults, 652*
SHKLAR, G.: alveolar bone; cortisone effect; estrogen, 707*
SILBERKWEIT, M.: filling materials; dentin growth, 712*
Silicones: calculus, 670*
Silver nitrate: caries, 735*
SINGER, L.: enzyme inhibition; fluorides, 685*
——: fluoride determination; hydrogen; fluoride diffusion, 646*

——: fluoride ingestion; mammary carcinoma, 648*
SKINNER, E. W.: acrylic resin dentures; self-curing; dimensional stability, 696*
——: dental bur; cutting; effectiveness; design, 693*
——: irreversible impression materials; Sears technic, 699*
SMITH, D. L.: gallium alloys, 700*
SMITH, F. A.: fluoride depth; enamel, 650*
——: radioactive tagged sodium fluoride; soft tissue distribution, 709*
SMITH, Q.: enzyme inhibition; fluorides, 685*
SNYDER, M. L.: salivary amylase; quantitative test, 654*
SOBEL, A. E.: citrate incorporation; in vitro calcification, 497
Socio-economic level: caries, 715*
Sodium: enamel permeability; fluorides, 650*
——: saliva, 716*
SOGNNAES, R. F.: cornification; histochemical observations, 686*
Solubility: enamel surface, 504
SOMMER, B.: amino acids; effect on enamel-decalcifying buffers, 650*
——: enamel decalcifications; acids, 671*
SPEIRS, R. L.: composition; deciduous teeth; development time, 736*
——: fluoride concentration; dental tissues, 734*
SPIES, T. D.: amino acid requirements; acidogenic organisms, 339
SREEBNY, L. M.: proteolytic enzyme; submaxillary gland, 685*
STACK, M. V.: enamel protein fractions; purification, 686*
——: salivary tryptophane; caries experience, 316
Staining reactions: demineralization; chelating agents, 136
STANFORD, J. W.: denture repairs, 700*
Stannous fluoride, 33, 50, 538, 606
Starch sponge: bone implants, 668*
STEERE, A. C.: fluorine exposure; radiocalcium deposition, 711*
——: radiocalcium deposition; fluorine effect, 670*
——: urinary fluoride excretion; fluoridated water, 692*
STEIN, G.: tongue pathology, 738*
STEIN, L. M.: mouth rehabilitation; salivary lactobacillus, 717*
STEPHAN, R. M.: caries production; different rat strains, 687*
——: ——; EDTA; reversal, 660*
——: EDTA caries; basic diet, 707*
STEPHENS, R. G.: periodontal disease; prevalence and incidence, 673*
Sterilizing agents: dentin, 712*
Strain: resins, 695*
Streptococci: glucuronidase production, 684*
Stress pattern: class II cavity restoration, 757
Succinoxidase: oral tissues, 680*
Sucrose: caries production, 664*, 688*
Sugar: calcium and phosphate ion diffusion, 212
——: caries, 666*, 717*, 824
——: effect on hydrogen ion diffusion, 206
——: (See also carbohydrate, dextrose, sucrose)
SUHER, T.: caries; socio-economic level; food habits; oral hygiene, 715*
——: caries experience; institutionalized children; Pacific Northwest, 552
——: caries incidence; 1- to 6-year-old children, 808
SULLIVAN, H. R.: early carious lesions; enamel, 218, 231
——: enamel surface solubility, 504
SUTTON, R. M.: fusospirochetal infections; experimental production, 671*
SWARTZ, M. L.: amalgam condensation; residual mercury content, 12
SWAYNE, P.: root molar germs; in vitro cultivation; clot, 669*
SWEENEY, W. T.: resins; measurements, 695*
——: water sorption; methyl methacrylate, 693*
Swelling: hyaluronidase effect, 657*
——: photogrammetric measurement, 295
SWENSON, H. M.: dilantin sodium; gingival enlargement, 468
SYMONS, N. B. B.: histochemical study; developing teeth, 731*

TAM, J. C.: developing tooth transplantations, 653*
TANNER, P. H.: air-driven dental hand piece, 700*
Tel Aviv: caries; gingivitis, 711*
TENENBAUM, B.: ovarian function; periodontosis, 719*
Thiourea: radioactive; enamel penetrations, 767
THOMASSEN, P. R.: hamster caries; beryllium, 670*
THOMPSON, F. C.: micro-antimony electrode; oral pH, 849, 854
Thymine: whale cementum, 735*
Thyroid: metabolism; fluoride, 661*
Thyroidectomy: tooth eruption, 80
Thyroxin: tooth eruption, 80, 104
Tobacco smoke: vitamin-deficient epithelium, 666*
TONGE, C. H.: floor of mouth; formation, 732*
Tongue: pathology, 738*
Tooth: brushing; oral health, 708*
——: development; phosphatases, 646*
——: ——; propylthiouracil, 364
——: eruption; growth hormone, 104
——: ——; hormonal control, 80, 104
——: ——; hypophysectomy, 104
——: ——; thyroxin, 104

——: germ; in vitro cultivation, 181, 189, 669*
——: ——; ——; dissection, 201
——: ——; transplanted; dibenzanthracene effect, 657*
——: ——; ——; methylcholanthrene effects, 531
——: ——; vascularization, 730*
Tooth movement: histologic response; rat, 481
Torque: round wire, 713*
TOVERUD, S. U.: calcium intake, calcification, 676*
Transplantation: developing teeth, 653*
TRAUTZ, O. E.: magnesian Whitlockite; x-ray diffraction identification, 687*
Trigeminal sections: herpes, 737*
Trismus: hyaluronidase effect, 657*
Tryptophane: efficiency; effect on rat jaws, 309
——: salivary; caries experience, 316
Tubercle: Carabelli, 435
Tuberculum dentis, 705*
TURESKY, S. S.: gingival healing; vitamin C effects, 273
TURNER, E. P.: enamel cuticle; erupted teeth, 732*
TURNER, F.: saliva; sodium and potassium concentration, 716*
TURNER, N. C.: caries; salivary acidity; alkalinity; pH, 55

ULTRASONICS: cavity preparations, 698*
Unacaine: 653*
Urea: caries; 709*
——: radioactive; enamel penetration, 767
Urinary excretion; fluoride, 692*

VACHER, H. C.: dimensional stability; amalgams, 697*
VAN HUYSEN, G.: artificial dentures; oral mucosa, 701*
Variant dimensional proportions: genetic and morphologic studies, 704*
Vascularisation: tooth germs, 730*
VIDAIR, R. S.: periodontal fiber reattachment, 737*
Virus: oral mucosal ulcerations, 731*
Vitamin C: effect on gingival healing, 273
Vitamin C deficiency: epithelium; tobacco smoke effects, 666*
——: oral lesions, 645*
VOLKER, J. F.: caries-susceptibility; desalivated hamsters; sugars, 666*
——: sucrose administration; hamster caries, 688*

WAERHAUG, J.: enamel cuticle, 690*
WAH LEUNG, S.: calculus formation; silicones and lactones, 670*
WAINWRIGHT, W. W.: radioactive materials; diffuse penetration from enamel surface, 767
WALDO, C. M.: histologic response; tooth movement; rat, 481
WALLACE-DURBIN, P.: fluoride metabolism; radioactive fluoride tracer, 789
WANTLAND, W. W.: parasitic fauna; hamster, 717*
WARE, A. L.: dental amalgams; manipulative variability, 701*
WARREN, O.: carious dentin; electron microscopy, 20
WASDELL, M. R.: fructofuranosidase; saliva, 729*
Water sorption: methyl methacrylate, 693*
WATSON, J.: dentinal attack; artificial mouth, 681*
WATSON, M. L.: developing enamel; electron microscopy, 690*
——: electron microscopy; dentinogenesis, 718*
——: enamel rod; three-dimensional structure, 718*
WEDDLE, D. A.: fluorine metabolism; rat, 688*
WEIDER, S.: secondary dentin; cavity preparation; fillings, 718*
WEINMANN, J. P.: estrogen effect; alveolar bone; gingiva, 115
——: gingival inflammation; spread; injury effects, 263
——: pulp response; paraformaldehyde cavity preparation, 663*
WEINREB, M. M.: caries; Israel, 719*
WEISENGREEN, H.: ovariectomy; periodontal effects, 702*
WEISENSTEIN, P.: caries; dentifrice; brushing; participation effects, 690*
WENTZ, F. M.: gingival tissue; abrasive injury reaction, 667*
Whale: cementum; thymine, 735*
WHEATCROFT, M. G.: x-ray radiation; salivary glands, 706*
Whitlockite: magnesian; x-ray diffraction identification, 687*
WIENER, R.: ovarian function; periodontosis, 719*
WILEMAN, W. R.: acrylic adhesions; enamel surfaces, 694*
——: adhesion; acrylic autopolymers; tooth structures, 701*
WILLIAMS, N. B.: adhesion; human tooth structures, 699*
——: oral bacterial proportions; penicillin effect, 689*
WINER, R. A.: whole salivary enzymes; determination distribution; origin, 321
WISOTZKY, J.: saliva; polarographic analysis, 689*
WOLF, W.: fluoridation; caries rates; 6-, 7-, 8-year-olds, 662*
WOLFE, W. R.: gingivitis; chlorophyll dentifrices, 647*

WOODS, E.: caries prevalence; Idaho children, 542
WUST, C. J.: fluoride reagents; enamel surface, 50

X-RADIATION: intracellular oxidative enzymes, 705*
——: salivary glands, 715*
X-ray diffraction: magnesian Whitlockite, 687*
X-ray radiation: salivary glands, 706*
(See also radiation, radiography)

YAMANE, G. M.: subminimal magnesium effects; hamster; teeth, 691*
YUDKIN, E.: fluorine retention; human tissue, 691*

ZACHINSKY, L.: normal gingiva; histologic variation, 580
ZANDER, H. A.: mitotic activity; periodontal tissues, 459
——: periodontal tissues; mitotic activity, 692*
Zinc oxide-eugenol: impression paste; properties, 693*
——: reactions, 694*
ZIPKIN, I.: fluoride absorption; gastrointestinal tract, 711*
——: fluorine exposure; radiocalcium deposition, 711*
——: radiocalcium deposition; fluorine effect, 670*
——: urinary fluoride excretion; fluoridated water, 692*
